• Connect with 0/1-10V dimming driver (no use dry contact output)

• Connect with 0/1-10V dimming driver (use dry contact output)

Note:

We recommend the number of LED drivers connected to 0/1-10V dimmer does not exceed 20 pieces, The maximum length of the wires from dimmer to LED driver should be no more than 50 meters.

Operation

Set 0/1-10V output mode

Within 3s of power-up, press and hold the set button for 5s to switch between 0/1-10V output types:

When LED flashes once, output 0-10V signal.

When LED flashes twice, output 1-10V signal.

ON/OFF and dimming by set button

After 3s of power-up, short press the set button to turn on/off the relay and 0/1-10V signal.

Press and hold the set button 1-6s to adjust 0/1-10V signal level, namely adjust the light brightness.

DALI address assigned by DALI masters

DALI address can also be assigned by DALI Master controller automatically.

Please refer to user manuals of compatible DALI Masters for specific operations.
